

Providing companies an expertise in interactive software design and development for over 30 years. Focusing on **educational software, game design, mobile & web apps, UI/UX, AI integration**, and **web development** supported by an extensive knowledge in advanced languages and technologies including **JavaScript, Java, WebGL, PHP, C#**, and many others. My aptitude for visual design, UI architecture, and creative thinking complement my broad skill set for building both unique and engaging software. With my **proven performance, extensive experience, and solid work ethic**, I provide a wide variety of efficient and creative solutions.

Designing and developing over 13 computer-based training programs, many of which have been used worldwide in places as far reaching as Australia and Afghanistan. Building a CMS for powering these projects to help meet deliverables and promote reuse of content, media, and code.

- Creative Thinker
- Problem Solver
- Discerning
- Team Builder
- Trailblazer
- Perseverant

A collage of various technology and programming logos, including HTML5, JavaScript (JS), Python, PHP, Java, and others, arranged in a circular pattern.

B.S. in Computer Science
Emphasis in Computer Graphics
Montana State University
1995 - 2000

- Backpacking / Fishing
- Snowboarding / Climbing
- Philosophy / Theology
- Reading / Learning
- Art / Design / 3D
